ITH SUGAR SKULL FACE MASK WITH EARRINGS MACHINE EMBROIDERY DESIGN

HOW TO CREATE, A STEP-BY-STEP PROCESS

Visit royal-present.com

LET ME GIVE YOU A PIECE OF ADVICE

If you use a fabric water-soluble stabilizer like GUNOLD Solvy Fabric (3-4 layers) your mask will be soft and elastic in the wash. The tear-away stabilizer makes the mask a bit more firm

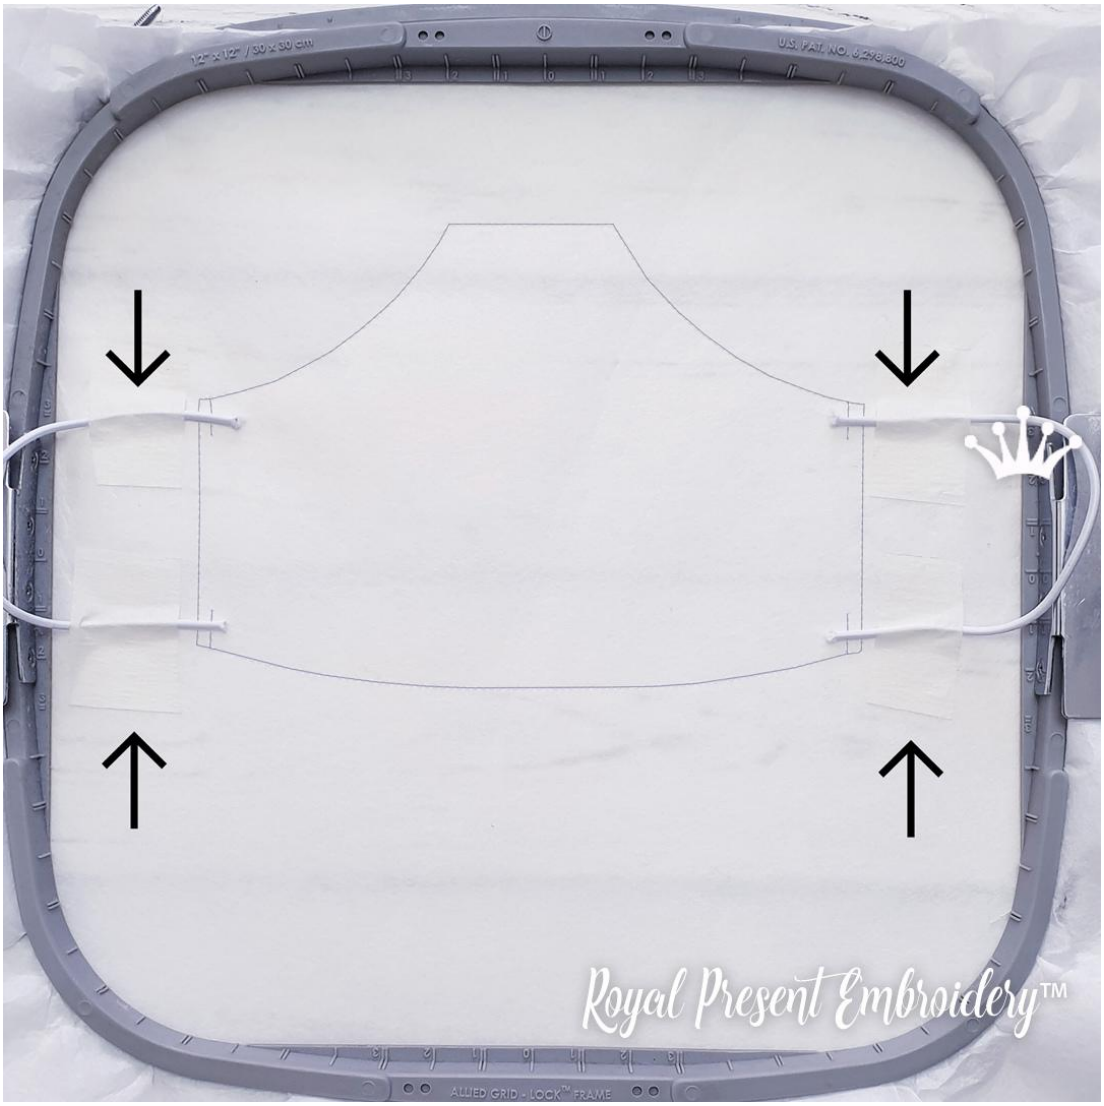
HOW TO CREATE, A STEP-BY-STEP PROCESS

Visit royal-present.com

STAGE 1

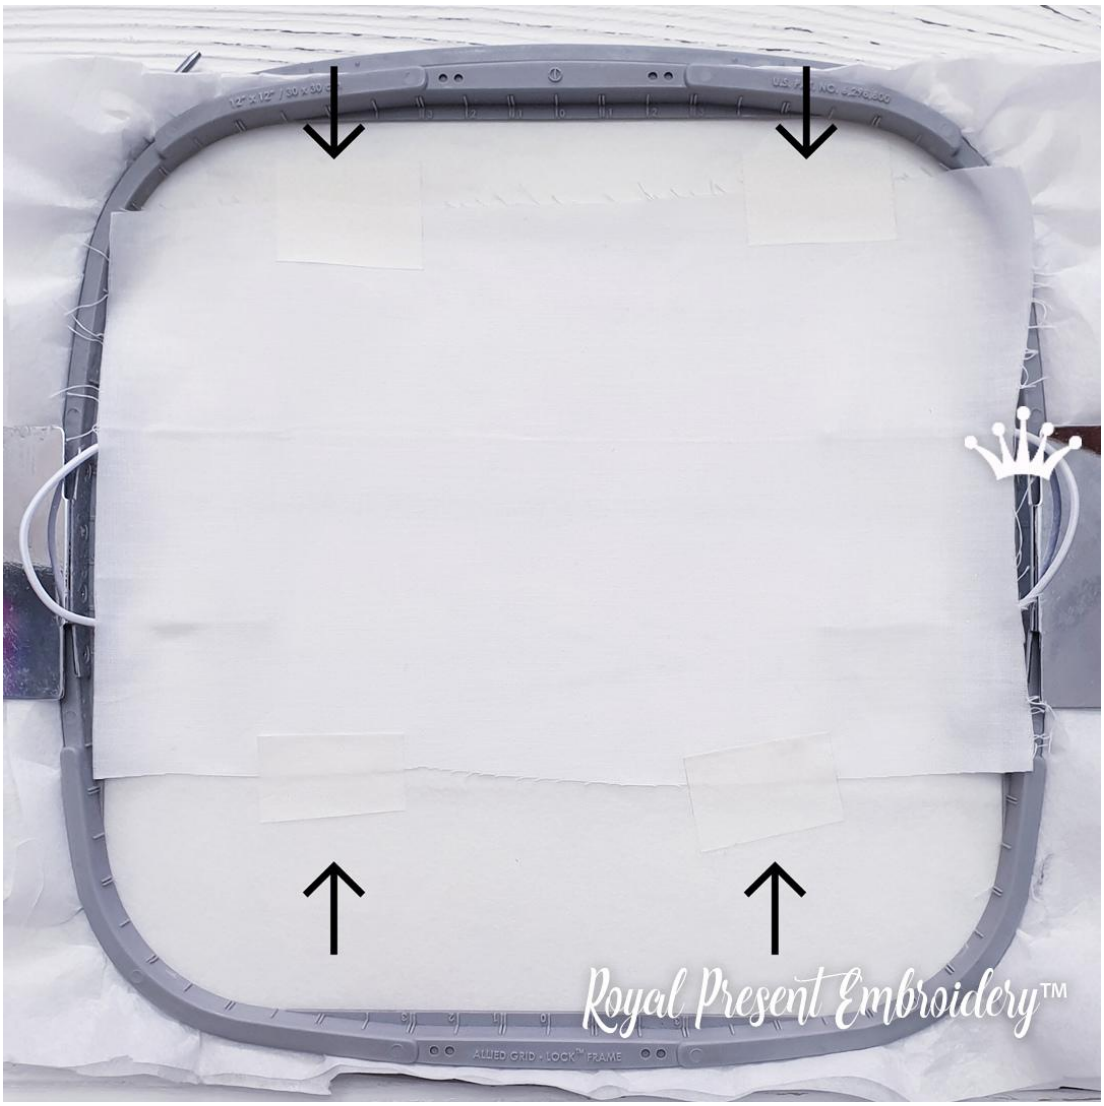
Start by cutting 2 lengths of an elastic band at 19 cm (7,4 inch) each. Attach the stabilizer, only, to the frame, and embroider the first color in your embroidery file.

Position the elastics at the marked points and embroidery the next color which will hold the elastic in place.



STAGE 2

Remove the hoop from the embroidery machine and place your choice of fabric on top. Fix it with the duct tape please



Return the hoop to the embroidery machine and continue stitching. Then embroider a running stitch around the perimeter of the mask.

STAGE 3

Embroider the mask. As soon as you did it, take the hoop out of the machine

Remove the hoop from the machine and place your choice of fabric underneath the hoop, and tape them in place.

STAGE 4

Fix it with the duct tape, please

Return the hoop to the embroidery machine and continue stitching. Then embroider a running stitch around the perimeter of the mask.

STAGE 4

Remove the hoop from the machine and cut away the edges of the top fabric. Cut as close as possible to the running stitches, both on top and underneath the hoop.

Return the hoop to the machine and finalize it with a satin stitch around the edges of the faced mask.

STAGE 5

Remove the fabric from the hoop and detach the stabilizer from the mask. You are nearly there.

STAGE 6

Lastly, stitch the top and bottom creases together on a sewing machine, (or simply stitch by hand).

Congratulations! You have made your protective face mask.

Wash your hands and stay 1.5 metres from others.
