

**So, to get such a mask without removing the fabric from the hoop, you will need:**

1. Fabric, for example, cotton
2. Cut-away stabilizer
3. The glue of a temporary fixation
4. Textile tape 10 mm wide (2 x 18,5 mm length) in a suitable color
5. ITH Face Mask Machine Embroidery Design

## **Instruction**

1. Hoop the stabilizer. If you make the face mask using the black fabric, it is better to use black stabilizer.

2. Turn on the embroidery machine. The machine will sew an outline. These are the borders of the mask.

3. Place a piece of cloth that is suitable for the size of this contour.

4. Turn on the machine; it will sew fabric to the stabilizer. Thereafter cut the excess fabric close to the stitch.

5. Embroider the mask pattern.
6. Then the machine will sew tags for attaching the ties. Stop the embroidery machine.
7. Put the ties in the place of the marks. **On the backside of the embroidery!!!** Fix the rubber bands with a scotch-tape, if it is needed.

The machine will sew the strings in the mask. As soon as you see that the machine has finished embroidering, stop the process.

8. Put a piece of fabric UNDER THE HOOP. The machine will make a contour, stitch the ribbons to the fabric.

9. Turn on the machine; it will sew fabric to the mask. Cut the fabric from the back close to the stitch.
10. The machine will sew a satin roller around the mask.

11. Tear off the excess stabilizer.

12. Sew the cutouts at the bottom and at the top of the mask with a blind stitch.

Everything is simple. You just have to iron it well.
